Proficiency Testing
How does it work?

Seta Analytics

Participants registered onto scheme

Participants will be registered approximately 1 week before the scheme is due to start.

Upon registration, participants will receive an email which includes; despatch details, a unique lab code, unique lab ID and further instructions.

PT Scheme kit despatched

Each quarterly PT Scheme kit is despatched during the last week of the previous quarter and includes; a verification fluid, activator solution, instruction sheet, syringes, needles and Material Safety Data Sheets (MSDS).

Tracking details will be provided to the recipient of the PT Scheme kit.

Testing and online reporting

Participants have 1-2 weeks testing time and will be sent a reminder if results have not been submitted.

Test results are reported online using the 'unique lab code' issued in the registration email.

Participants will be sent an email with their results and the expected tolerance range. Participants with results outside the expected tolerances will be notified immediately and provided with advice and support including a diagnostic checklist.

Scheme closes 20th of that month

The 20th of that month is the last day participants are able to submit results online.

Results which are not reported online will not be included in the end of month summary report.

Data gathered and report created

Summary report distributed

The summary report is distributed to participants by email directly from the PT Scheme website.
